Modern
Shed™
Backyard Studios

If you are looking for
creative solutions for your
challenging location, we are
ready to hear from
you.

Two decades of experience.
Thousands of small
backyard spaces. We have
the answer.

Our unique prefabrication process allows us to bring your shed to the desired location in panels and assemble in just a few days.

Picture yourself in your new backyard shed.
Will you be working from home? Indulging in
your favorite hobby, or just plain relaxing?
Modern Shed can provide the perfect space.

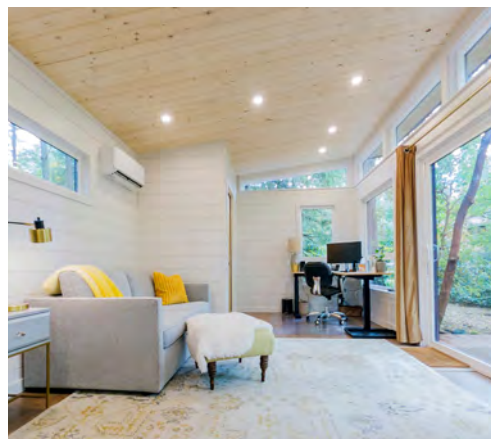

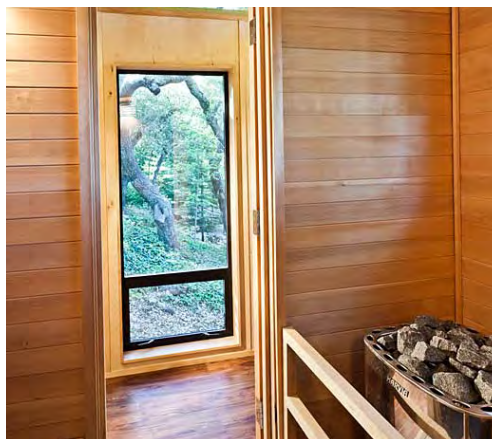

Your home
is a reflection of you. —

We tailor **your Modern Shed** to be an extension of that.

**No two sheds are
exactly the same.**

Our designers work with
you to create a building
specifically for you.

Quality is important.

Our workmanship and materials are of the highest caliber because details matter.

Remember, **your shed is an extension of your home.**

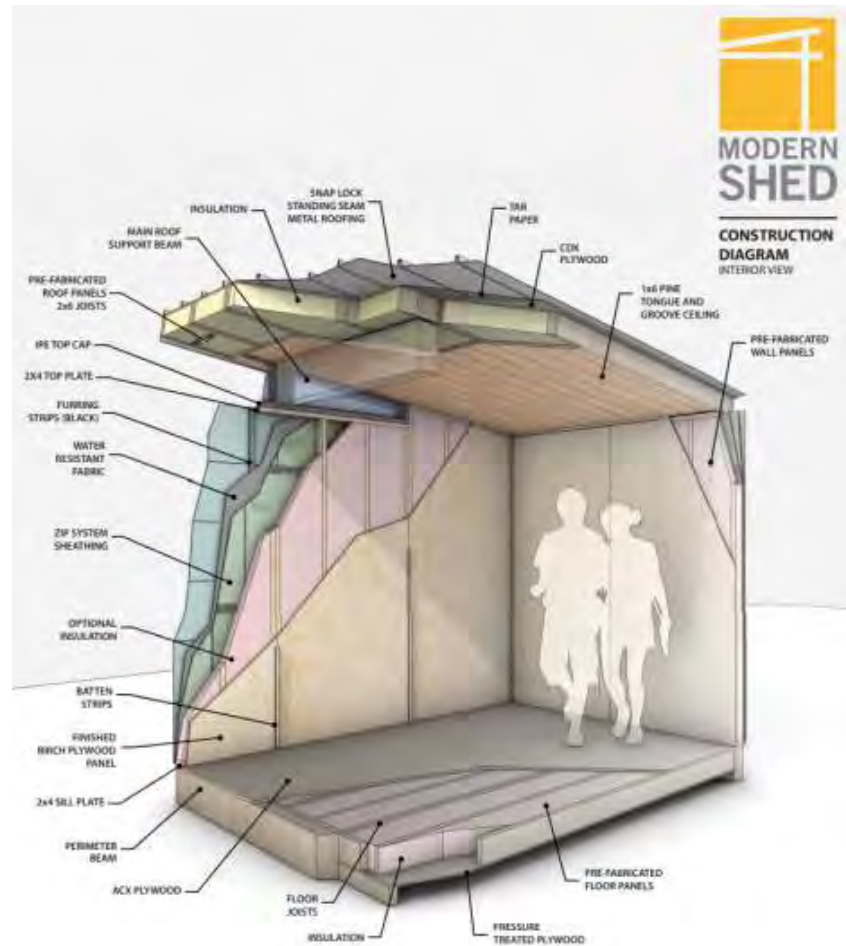

Fabricated

like no other shed.

Modern Shed has become a leader in innovative, sustainable, prefabricated structures.

Made individually indoors, each shed consists of easy-to-carry panels. They are fabricated to IBC standards, and can be modified to comply with stricter California Building Code.

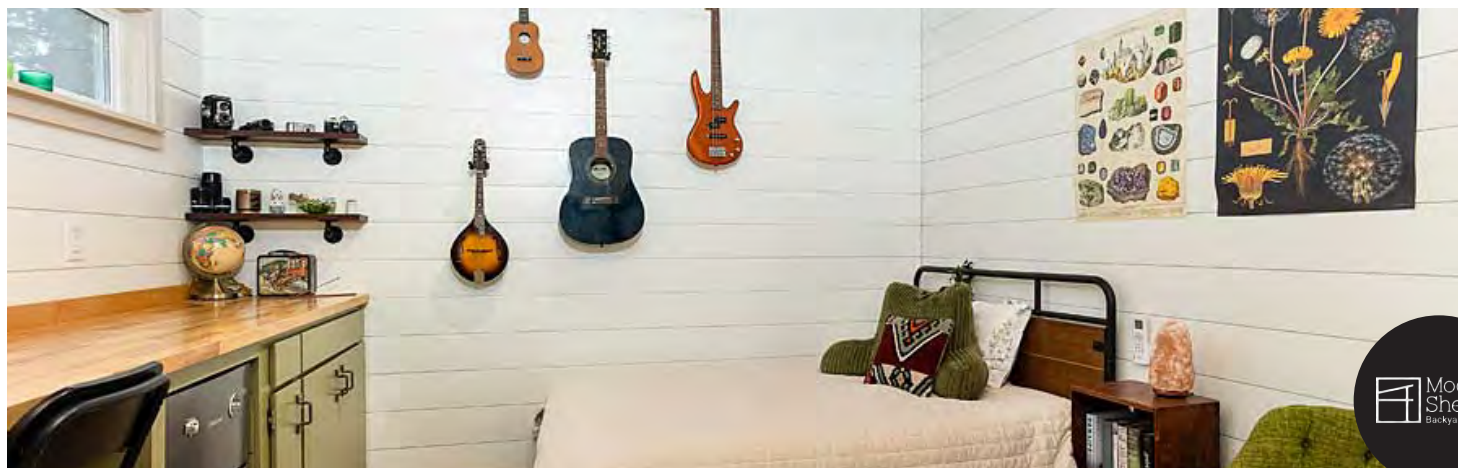

They can also be engineered and upgraded to stricter energy code regulations.

Modern Shed installation begins with delivery to your front door, and panels carried to your backyard.

Our authorized installers handle it all. Or you may choose your own installer.

Designs

Our design consultants work personally with you to achieve the look you desire. From size to finishes and colors, we provide your style in your new space. Now that you've downloaded our catalog, check your email and reply to schedule a free design consultation.

About pricing:

Each shed is fabricated per customer-no two are exactly the same. This is why we do not publish a price list.

Request a 15 min call with a designer to discuss feasibility and budget.
